SessionID

# How to build your custom GameDay

Andreas Seemüller  
Consultant  
Amazon Web Services – Professional Services

# Agenda

- Introduction into the GameDay exercise concept
- How to design the modules of the exercise
- How to schedule the modules
- The final event

# Introduction into the GameDay exercise concept

# Module viability checks

- How can the participant detect the beginning of the module?
  - Do I have the right monitoring in place?
  - Are the alarm messages / dashboards clear and actionable?
- How can the participant solve the module?
  - Do I have the correct operational procedures defined and documented?
  - Do my participants have the skills to solve the module?
- How can I simulate the module?
  - Regarding your platform / application to be tested
  - Regarding your adjacent systems required for operations

# Thank you!
